EXAMINER

BREWSTER, WILLIAM M

ART UNIT PAPER NUMBER

2823

DATE MAILED: 10/08/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/673,874	Applicant(s) CONTOPANAGOS ET AL.	
	Examiner William M. Brewster	Art Unit 2823	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 August 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) 9-15 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Claims 9-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 27 August 2004.

Applicant's election without traverse of claims 1-8 in the reply filed on 27 August 2004 is acknowledged.

Claim Objections

Claim 4 is objected to because of the following informalities: in line 5, delete "one" and insert --on--

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhu et al., U.S. Patent No. 6,133,079.

Zhu anticipates a method for manufacturing an on-chip inductor consisting of: in fig. 4, creating at least one conductive winding 59 on the at least one dielectric layer; and least one dielectric layer 52; creating a P-well 28 having a major surface parallel to a major surface of the dielectric layer, col. 4, lines 32-62;

limitations from claim 2, the method further consists of: creating a field oxide 50 having a major surface that is juxtaposed to the major surface of the P-well 28, limitations from claim 3, the method of claim 1 further consists of: creating the at least one dielectric layer 52 to include one layer; and creating the at least one conductive winding to include a spiral winding 59 on the one layer, col. 4, lines 32-62;

limitations from claim 4, the method of claim 1 further consists of: creating the at least one dielectric layer to include a plurality of layers, 52, 57; and creating the at least conductive winding to include a plurality of single windings, the different windings of structure 59 on the plurality of layers, col. 4, lines 32-62;

limitations from claim 5, the method of claim 1 further consists of: creating the at least one dielectric layer to include a plurality of layers, 52, 57; and creating the at least conductive winding to include a plurality of spiral windings, the different spiral windings of structure 59 on the plurality of layers, col. 4, lines 32-62;

limitations from claim 6, the method of claim 1 further consists of: creating a substrate 20 having a major surface parallel to the major surface of the at least one dielectric layer 52.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhu as applied to claims 1-6 above, and further in view of Jones, JR et al., U.S. Patent No. 4,713,711.

Zhu does not teach forming a differential inductor, but Jones does. Jones teaches in fig. 2A, limitations from claim 7, the method of claim 1 further consists of: creating a secondary winding 20' magnetically coupled to the conductive winding 17, col. 4, lines 45-68; limitations from claim 8, the method of claim 1, in fig. 2B, wherein the at least one conductive winding further consists of: creating a center tap potential to produce operably coupled to a reference a differential inductor, col. 4, lines 21-68. Jones gives motivation in col. 5, lines 32-46. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to recognize that combining Jones's process with Zhu's invention would have been beneficial because the invention has improved noise rejection when making differential measurements with respect to a common connection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William M. Brewster whose telephone number is 571-272-1854. The examiner can normally be reached on Full Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on 571-272-1855. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
